

Publication Ethics and Publication Malpractice Statement

Journal of Applied Mathematics and Computational Mechanics is a peer-reviewed journal

Duties of the Editors

1. The Editor has the right to accept or reject the manuscript based on the review,
2. The Editor is responsible for examining the manuscript's originality and forwarding it to two Reviewers for blind peer-review. The manuscript may be accepted, rejected or sent for modification,
3. The Editor should evaluate the manuscript for its intellectual content without regard to race, gender, sexual orientation, religious belief, ethnic origin, citizenship, or the political philosophy of the Authors,
4. The Editor must not disclose information about the submitted manuscript to anyone except for the corresponding Authors, Reviewers and members of the Editorial Board.

Duties of Reviewers

1. The Reviewer must not disclose any information about the reviewed manuscript,
2. The Reviewer must ensure that authors have acknowledged all sources of data used in the research. If Reviewer notices similarity between the manuscript and other published paper, she/he should inform about this issue to Editor.
3. The Reviewer should express his/her views clearly with supporting arguments,
4. If the Reviewer feels unqualified to review the research reported in a manuscript or knows that its prompt review will be impossible, he or she must inform the Editor, so the manuscript could be sent to any other referee.

Duties of Authors

1. The Authors should prepare the article in the English language and in accordance with the publication preparation guideline "For Authors",
2. The Authors should guarantee that submitted article is original and has not been published elsewhere in any language and is not being considered for publication elsewhere,
3. The Authors must guarantee that they have appropriate authority from their employers and/or funding agencies to publish the manuscript,
4. The Authors must ensure that their submitted article is entirely original work,
5. The Authors should provide all data in connection with their work,
6. If the work involves chemicals, procedures or equipment that have any unusual hazards inherent in their use, the author must clearly identify these in the manuscript.
